

# Exapta's Ninja seed bounce flap for JD 50 & 90-series drills (and 60-series drills updated to 90-series boots)

## Assembly:

Photo shows the correct orientation of flap. Use the longer bolts provided. Re-use the clip on the Extended Wear boots (hold the clip in place with one hand, while sliding flap in with the other). Slide flap in from top – if you have any difficulty, use dish soap as a lubricant. It often helps to pull the boot away from the blade.
